

Introducing the Aquabot Extreme Series™

# CLEAN CONQUERED

**aquabot**® EXTREME SERIES™

# AQUABOT TAKES THE WORK OUT OF POOL MAINTENANCE

Owning a pool can be stressful. For many, pool maintenance has taken the joy out of something that should be fun and relaxing. But it doesn't have to. Aquabot revolutionized at-home pool cleaning by inventing the very first robotic pool cleaner over 30 years ago. With the Extreme Series, we are delivering our most powerful and affordable robotic pool cleaner yet.

Aquabot pool cleaning robots save you up to 30% on your total chemical usage, while being 93% more efficient than a standard main pool filter system. Our industry leading pumps and filtration systems circulate more water and catch more debris than any other cleaner in the market, so your pool stays naturally cleaner with a lot fewer chemicals.

## A HEALTHIER CLEAN

Industry leading pumps that mix up to 85 GPM and top-of-the-line filtration down to 2 microns means that your pool stays cleaner, clearer and requires fewer chemicals. We believe that water starts pure and should remain as close to nature as possible so that you and your family are safe, happy and healthy.

## ADVANCED FILTRATION

The industry's best filtration system takes care of more dirt and debris than any other. Aquabot's powerful micro brushes pull up dirt and debris while our high-quality filter baskets take care of the rest. The two large, top-loading filter baskets are sturdy and easy to remove and clean out. And our ultra-fine mesh filters don't just catch leaves and dirt and all the debris you can see, but fine particles and contaminants you can't see down to 2 microns in size. The superior water filtration of the Aquabot Extreme Series means you can use fewer pool chemicals for an overall healthier clean. So your pool doesn't just look cleaner, it's the cleanest it can be.

**"JUST PLUG IT IN,  
DROP IT IN THE POOL  
& WATCH IT GO."**

## PERFORMANCE CLEANING

All you need to do is drop Aquabot Extreme Series into your pool and your work is done. AutoX Pool Mapping technology determines the approximate dimensions and optimum cleaning cycle for your pool and true 4WD wheels provide superior grip as it travels along the walls. A powerful rotating micro-brush scrubs the surfaces from floor to waterline and everywhere in between. Aquabot runs on an ultra-efficient DC motor and uses only 180W as it cleans your pool, for significant energy savings. The innovative design of the Aquabot Extreme Series cleans your pool so thoroughly and efficiently, each cleaning costs less than a nickel.

Endurance

### **3 YEAR WARRANTY**

The Aquabot Extreme Series is the best value you can get in a pool cleaner. And that includes a 3 Year Warranty for hassle-free cleaning for years to come.

Simplicity

### **PROGRAMMABLE POWER SUPPLY**

The simply interface on the included programmable power supply enables users to quickly and easily control the Aquabot robot.

Available Convenience

### **POOL ROBOT CADDY**

The optional caddy makes transporting the X4 to and from your pool easier than ever. The convenient design allows for easy transportation of the robot, the power supply and the floating power cord.

## X4 EXTREME SERIES™

No other robotic pool cleaner comes close to matching the Extreme Series™ combination of performance and reliability at a price you deserve.

aquabot X4

Pool Type:	Above Ground & Inground
Pool Size:	up to 60 ft.
Shape:	All
Surface Type:	All Pools (Wheel kit available for tile and fiberglass)
Method of Propulsion:	4 Wheel Drive Train
Wall Climbing:	✓
Filter Loading:	Easy Top Access, Clear View
Filter Type:	2 Filter Baskets with Nylon Mesh
Cable Length:	60 ft
Timer - Auto Shutdown:	✓
Warranty:	3 Years
Coverage:	450 sq. ft. / per hr
Gallons Per Minute:	70.4
Cost of Operation:	\$0.05 (per cleaning)
Cleaning Time:	3 Hours
Filter Capacity:	190 (2x95) Cubic Inches
Voltage Power Supply:	24 VDC
Watts:	180W
